CAREER OBJECTIVE

I am Kawan Aureliano da Silva, a Cloud Specialist with expertise in cloud computing and IT infrastructure management, and I am pursuing a career path as a DevOps Engineer. I have strong knowledge of Oracle Cloud Infrastructure (OCI) and Microsoft Azure, focusing on building scalable, secure, and cost-efficient solutions. I am motivated to keep improving my skills while contributing to projects through cloud expertise, IT automation, and innovative solutions, aiming to grow professionally as a DevOps Engineer.

PROFESSIONAL EXPERIENCE

STATUM

Cloud Specialist | 09/2024 - Currently

At Statum, I work as a Cloud Specialist, primarily focused on the design, provisioning, and automation of cloud infrastructures. My main expertise is with Oracle Cloud Infrastructure (OCI) and Microsoft Azure, ensuring scalable, secure, and cost-efficient environments.

Key responsibilities:

- Provisioning and automating cloud environments (networks, compute, storage, security).

- Managing and optimizing Linux and Windows servers within hybrid and multi-cloud architectures.

- Implementing monitoring strategies with Zabbix to maintain system availability and performance.

- Deploying cloud-based applications and services with Docker, including tools like Metabase, integrated into corporate platforms.

- Managed service requests and incidents using ITSM tools (GLPI).

- My role is strongly centered on cloud adoption, automation, and infrastructure reliability, enabling organizations to operate with agility and efficiency.

STATUM

Cloud Support Intern| 01/2024 - 09/2024

During my internship, I provided technical support for cloud environments, with a focus on Oracle Cloud Infrastructure (OCI) and Microsoft Azure. My responsibilities included incident handling and follow-up, as well as proactive monitoring using Zabbix to ensure stability and operational efficiency. Key responsibilities:

- Monitoring cloud environments (networks, compute, storage, security) with Zabbix.

- Managed service requests and incidents using ITSM tools (GLPI).

- Assisted in maintaining and troubleshooting cloud infrastructure on OCI and Azure, ensuring high availability and performance.

CERTIFICATIONS

- OCI Architect Associate | Oracle
- OCI Developer Proffesional| Oracle
- OCI Foundations Associate | Oracle
- Microsoft Fundamentals - AZ-900 | Microsoft

EDUCATION

Universidade do Estado de Minas Gerais (UEMG)

Bachelor's Degree in Information Systems | 2023 - 2026
